## DuraGlow® Photoluminescent Tactile/Braille Acrylic Signs - HDI-ARA-DB-1 & 2

### Unique Features

#### Only photoluminescent signs:

- Are made of 1/8 inch thick solid, optically clear acrylic preferred by architects & interior designers.
- Feature long-afterglow Strontium Oxide Aluminate photoluminescent crystals embedded within & evenly dispersed throughout high-impact cast acrylic.

### Specifications

- **Copy:** Choose "AREA OF RESCUE" or "AREA OF REFUGE" copy. (Specify copy choice when ordering).
- **ADA-Compliant:** NFPA 170 universal wheelchair-accessible pictogram and copy in black raised tactile material with Braille below. Pictogram, copy & Braille fused to DuraGlow® acrylic photoluminescent glow-in-the-dark material.

Signs meet ADA requirements for Grade 2 Braille rasters and tactile signage with reference to contrast colors, letter size, pictograms, Braille, and location of sign components.

- **Sign Format & Dimensions:** Single-Sided. 8 inches X 8 inches.
- **Mount:** with combination of 2-faced tape for positioning & industrial strength glue for high-bond adhesion.
